Objective

A full stack web developer with extensive education, and intensive experience in the world of computer science. Looking for a full stack Ruby on Rails Developer position within a thriving environment.

Education

2009-2014	BSc. Computer Science, Life Sciences (Combined Major) *University Of British Columbia*

Experience

Mar 2015 - July 2015
Ruby on Rails Developer
Champ Technologies Inc.
"Online marketplace connecting homeowners with home service professionals" - worked here in a team of two developers on the 'Champ Manager' Web Application. Tasks included implementing Ruby on Rails backend (including AJAX, polymorphic associations)features, RSPEC testing, working with JSON data, Javascript, and learning/working with React JS.

Jan 2015- Mar 2015
CodeCore Ruby on Rails Developer Bootcamp
Many of the practical skills I possess come from or have been refined from my experience here - including things like GIT VC and Heroku App Deployment.

Mar 2012 – Mar 2015
Paladin Security
Health Care Security Officer
Worked at Richmond General Hospital, in a team of 3 security officers. Aggrivated, or inappropriatly acting patients and visitors often caused high pressure situations requiring on the spot thinking and quick action.

Projects

CodeCoreQ *(codecoreq.herokuapp.com)*
A collaborative group project consisting of 11 developers. Users are asked a series of coding questions to test their programming ability. Frontend developed with HTML, SASS and jQuery. Backend developed using Ruby on Rails

MMDB *(mymusicdb.herokuapp.com)*
Allows users to search though millions of songs (via third-party API), and select and save their favourite songs into their own collections. Backend developed with Ruby on Rails. Front End developed using HTML, CSS, Jquery, Javascript

TwitterWordCloud
(github.com/tkhan003/TWITTER_WORD_CLOUD)
A simple app which displays a word cloud based on your most used words within your personal tweets, as well as your twitter home feed. The more time a word is used, the larger it appears in the cloud. *NOTE: Many of the my other projects/code can be viewed at my Github page.*
